

Gynecologic Cancers Program

AT THE FOREFRONT

**UChicago
Medicine**

ENSURING THE BEST CARE

- » We will see your patients quickly and collaborate with you to create an individualized treatment plan.
- » Our nationally recognized experts, including our National Cancer Institute designated Comprehensive Cancer Center team, can review your patient's case and assist you with detection, diagnosis and treatment for gynecologic cancers that range from common to the most complex cases.
- » We offer the largest number of clinical trials involving innovative treatments for gynecologic cancers.
- » We are a lead site for the Gynecologic Oncology Group (GOG), a cooperative clinical trials group that is responsible for more gynecologic cancer research than any other research group in the United States.
- » Your patients will have access to our nationally and internationally known team of specialists who meet weekly at our multidisciplinary tumor board.

WE OFFER YOUR PATIENTS

- » Individualized, high-quality, compassionate care for women with ovarian, uterine, cervical, endometrial, vulvar and vaginal cancers, as well as complex benign gynecologic conditions.
- » Easy access to the most advanced diagnostics and treatments available for gynecologic cancers.
- » Consultation, often close to their homes.
- » Tailored treatments to optimize surgical outcomes, including minimally invasive, fertility-sparing and robotic surgery.
- » Access to the University of Chicago's Program in Integrative Sexual Medicine (PRISM), which has been designed to identify, prevent and treat sexual problems for female cancer patients.
- » Supportive oncology coordination.
- » Access to Woman to Woman, a unique peer-to-peer mentoring program for gynecologic cancer patients and caregivers.

We are committed to working with you to provide the best care for your patients.

DEAR COLLEAGUES,

I would like to introduce our program for women with gynecologic cancers, including ovarian, uterine, cervical, endometrial, vulvar and vaginal cancers.

Our multifaceted team of specialists consistently works to discover novel methods of detecting and treating gynecologic cancers. We are able to offer your patients a wide variety of treatment options, including newer therapies, for individualized care.

We look forward to collaborating with you and being a part of your patient's care team.

Best regards,

Diane Yamada, MD

*Professor of Obstetrics & Gynecology
Chief, Section of Gynecologic
Oncology*
