

CommunityRx for Caregivers of home-dwelling people with Alzheimer's disease and related dementias

Principal Investigators: Stacy Lindau, MD, MAPP, she/her & Elbert Huang, MD, MPH, FACP, he/him

Recruitment Duration: 12/2020 - 2/2022

Clinical Trials Registration: NCT04146545

Contact: communityrx-care@bsd.uchicago.edu 844-669-0066

Study Coordinator: Marisol De Ornelas, She/her; 773-834-8534; mdeornelas@bsd.uchicago.edu

CommunityRx-Caregiver is a study about unmet needs among caregivers of people with Alzheimer's disease and other dementias. Unmet needs could include things like food, housing, and social support. The purpose of this study is to help improve the health of caregivers and people with dementia and narrow gaps in health by addressing unmet health and social needs. The development of CommunityRx-Caregiver includes years of engagement and input from the CommunityRx-SHARE Community Advisory Board, including caregivers, patients, doctors and hospital leadership and staff.
